Health Service of the Canadian Medical Association

OSTEOMYELITIS

Osteomyelitis is an acute infection
in a bone. It is a disease which
develops quickly and which is severe
and each year it takes a toll of
lives, chiefly among children.

Loss of life, or extensive injury
results in these cases, because treat-
ment is not secured without delay,
for it is the delay of a day, or in-
stead of a few hours, in such cases

conditions as this, which leads to
serious and even fatal results.

Failure to secure early treatment
is due, in most cases, to the ignor-
ance of parents or others responsible
for the care of children regarding what
happens when there is an acute bone infection.

When a child complains of pains
in the leg or arm, what usually
happens is that the parents decide
that the child has "growing pains"
or rheumatism. This is a very com-
mon condition as "growing pains"; chil-
dren do not have pains just because
they are growing.

There is only one safe way to deal
with pains in the extremities and that
is to have the child examined in
order to find out definitely what
is the cause of the pain.

Not so long ago, when a child had
a pain in the stomach, he was given
a dose of castor oil. Parents no
longer do that because most of them
know that it is not the cause of the
pain. It may be a sign that there is
something serious about the condition,
and that perhaps some action should
be taken to stop the intestinal tract
in motion when it should be at
rest, with a dose of castor oil.

What if a child has a pain in the
stomach, a doctor is called. When
a child has a pain in his extremities,
a doctor should be called just as
promptly. The condition may be
quite as serious and require treatment
just as urgently.

There is generally a history of
injury which has been or is or slight.
This injury apparently lowers the
resistance of the area affected, and
if there are any germs present in
the body, they may find their way
into the area.

The germ reaches the area of
low resistance and the subsequent
formation of an abscess or infection.
If not properly and promptly
treated, the result will be an osteomy-
elitis, which is a very serious and
often fatal condition.

The germ reaches the area in the
blood stream. They may come
from the body, or from the outside,
or from the food, or from the air,
or from the water, or from the soil,
or from the dust, or from the
poisonous products.

The germ reaches the area in the
blood stream. They may come

UNDER CONTROL OR NO CONTROL?

Under Control: with beer being sold by reputable licensed hotels under government supervision.

No Control: with bootleggers running rampant as in the old prohibition days.

Reasons why you should NOT sign the prohibition petition urging the government to abolish the sale of beer by the glass or bottle, thus doing away with the beer rooms, clubs and canteens.

1. The proposal to disturb the act comes from a small body of people whose social theories have not withstood the test of actual experience.
2. The Trades and Labor Congress are on record as being in favor of the sale of beer-by-the-glass.
3. By virtue of the local option provisions of the act, communities may extinguish a license when a majority of public opinion so expresses itself.

4. No license has been withdrawn as a result of a local option vote either in 1929 or 1930, though licenses attacked were at points where conditions appeared to the prohibitionists, as favorable to a dry result.

5. In a total of 58 local option votes taken since the act came into force, only four licenses have been cancelled as a result of votes; and these licenses were, in every case, adversely affected by peculiar local influence.

6. Absence of criticism at the last two provincial elections.

7. Total accommodation, particularly at country points, has improved as a direct result of the act, to a standard unequalled in any other province.

8. The general endorsement of the act by the travelling public and the willingness of the public generally to assist in enforcing the act by giving information regarding infractions and interdicting those needing protection from their own weakness.

9. Bootlegging and moonshining have been eliminated as remunerative pursuits. This, together with strict government control, has placed all intoxicating liquor beyond the reach of minors; fewer cases of intoxication in the police courts, in spite of a considerable increase in population. Leave the police of the province free to perform their natural functions, that of protecting the people, not taking up their time trying to enforce what has proved to be unenforceable legislation. Remember you cannot legislate men's minds, because they will never obey a law they do not respect. This was proven in prohibition days.

10. The operation of the act provides a large public revenue (44 cents of every 10c expended); this has helped to increase the general revenue of the province, and prevent increased taxation. Formerly such revenue went to the bootleggers and moonshiners.

11. Official reports commend the act as eminently practical. They contain no important criticism of the act's clauses. Police reports indicate a continuous improvement in the general state of law and order.

12. The real motive prompting the petition is to render the act unworkable by eliminating the retail sale of beer-by-the-glass or bottle; the ultimate aim being a return to total prohibition.

If the beer rooms and clubs are abolished what does the Prohibition Party suggest to take their place? Is it to be liquor for the wealthy and prohibition for the worker?

The Moderation League of Alberta.

Bright Hue'd Cars Less In Demand

OTTAWA, October 26.—It would seem a report issued by the Canadian Automobile Association, that the demand for bright hue'd motor cars is less in demand than it was a year ago.

The meeting was called for the purpose of calling the roll of the club, which is the Canadian Automobile Association, 184 College Street, Toronto, will be answered personally by letter.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.
